IGC 700

Universal Module for Engine Control and Protection (all in one box)

- Integrated Governor Control for Constant or Variable Speed Applications like SDG 725 series
- Crank Termination, Fuel Valve or Solenoid Output, Alarm or Preheat Outputs (3 Relays)
- 5 Discrete type switch signal Inputs
- Micro-Processor Controller for intelligent system control

- Remote starting with battery system monitor
- PID loop for pump- or compressor-pressure control.
- Small convenient size and mounting
Panel Area Dimensions (127mm x 110mm x 31.75mm)
- Panel cut out and depth, (DIN 96x96x41.1mm)
